

Ian M. Stonecypher

DATA SCIENTIST / STATISTICIAN

Phone: (720) 582-3540 | Email: ianstonecypher@gmail.com | LinkedIn: www.linkedin.com/in/ian-stonecypher

EDUCATION

Colorado School of Mines, Golden, CO.

Graduate GPA: 4.0

Master of Science: **Data Science** | May 2025

Bachelor of Science: **Applied Math and Statistics** | May 2024

Awards and Honors: Tau Beta Pi Member | Seven-time Dean's List Honors student | Mines Choice Scholarship

EXPERIENCE

Data Science Intern | ICR, Inc. | Jun 2025 – Oct 2025

- Scraped and analyzed over 20 million lines of data using API calls and machine learning algorithms in Python
- Engineered LLM prompts and researched AI solutions that would lead to actionable insights
- Quickly learned full-stack development, Typescript, Angular, and HTML from no prior experience

Technology Intern | Transamerica | May 2023 – Aug 2023

- Uncovered patterns in large business data sets using machine learning algorithms in Python, clearly communicating actionable insights to stakeholders to automate application health monitoring
- Developed ETL pipelines, migrating gigabytes of data from mainframes to a data lake in AWS S3
- Documented info in a database using SQL update queries

Systems Engineer Intern | Northrop Grumman Corporation | Jun 2022 – Aug 2022

- Led a research project analyzing the current state of a software testing process, interviewing experts and delivering a report package to communicate insights and inform business strategy
- Researched a program with close attention to detail and clearly communicated what improvements to make

PROJECTS

SLQ & Tableau Film Gross Personal Project | Jul 2025

- Developed an interactive Tableau dashboard visualizing patterns in film grosses and IMDB ratings
- Loaded, cleaned, and analyzed over 100 million rows of data using SQL and Python scripts

Advanced Machine Learning Semester Project | Aug 2024 – Dec 2024

- Developed an interpretable machine learning model using Python to classify crops based on soil conditions
- Performed EDA, validated the data, and selected a model with optimal performance
- Synthesized results into a 6-page report with visualizations, communicating actionable insights

Computer Vision with Simpsons Characters Personal Project | Jul 2024

- Developed a machine learning model to identify characters from "The Simpsons"
- Trained, tested, and optimized a convolutional neural network using TensorFlow, achieving 82% accuracy

Statistics Capstone Semester Project | Mar 2024 – May 2024

- Provided analytical support to a researcher to help explain the fatigue responses of different types of foam
- Collaborated with a 4-person team to analyze the data and construct a model in R using statistical methods
- Communicated findings in a report and presentation, with actionable recommendations for further research

SKILLS

Machine learning, Data analysis, Statistics, Visualization, Python, SQL, R, LLMs, Excel, AWS certified, Gitlab, Detail-oriented, Problem solver, Exceptional communication skills, Fast and eager learner, Collaboration
